Leading Features of Markets at the East Liberty Yards.

ALL GRADES OF CATTLE ARELOWER

Hogs Touch the Lowest Point for Years and Still Are Weak.

SHEEP AND LAMBS IN LIGHT SUPPLY

OFFICE OF PITTSBUBG DISPATCH, WEDNESDAY, November 27, 1889. Receipts of cattle on Monday were 110 loads, against 85 the previous Monday. About five loads have been received since Monday, making a total for the week of 25 mbout ten loads of good shippers from Ohio, weighing from 1,400 to 1,450 pounds. There were none on the market which reached 1,500 pounds. The range for these better grades of cattle was \$4 00@4 30, and only a few reached the latter figure. The range for the same grade last week was \$4 10@4 40. All grades of cattle are off b@10c from last week's prices. There were no export buyers. The good cattle were mostly sold for shipment to New York.

Whas is Wanted Here.

Our local butcher trade calls for smooth, tidy stock, weighing from 1,100 to 1,300 pounds. All above the latter figure have been slow sale all this season. The great sbrinkage in receipts for local trade of late is due mainly to the diminishing demand for stockers. Buyers who were good for 10 or 15 loads of this class of cattle a month ago, now call for but 4 or 5 loads. Said

ago, now call for but 4 or 5 loads. Said a leading stockman this morning: "It was easier to place 150 loads of cattle a month ago than it is to place 100 loads now. The same number of buyers will take 50 loads less now than then. The reason is that the season is nearly over. After harvest for a few weeks grass was good, and farmers were looking out for stockers. Now they want something that is really to go right into the stable, and about all that are wanted are cheap poor cattle which we call straw trampers."

Weak Market for Hogs. Monday's receipts were large and markets were weak at a range of \$3 70@3 80 for Yorkers and Philadelphias, There has been no recovery from the slowness with which markets opened at the beginning of the week. Prices were as low at East Liberty as at Chicago for a day or two past. In fact markets were stead-ier at the latter place than either here or Cin-

cinnati on Monday.

Advices from Chicago to one of our promi nent packers this morning are that receipts there to-day were the largest this year, being in all 48,000 head. The outside price for the best at Chicago this morning was \$4 65@4 70.
There is a general feeling that bottom is not yet reached and that hogs will settle to a basis

There is a general feeling that bottom is not yet reached and that hogs will settle to a basis of \$3.50 for the best packers.

A leading stockman of East Liberty said this morning that with the prices of lard and bacon, which have ruled of late \$3.50 per cwt. is sufficient to pay for hogs. Said he: "I have been of the opinion for some time that either hog products must go up or hogs come down. It seems that hogs are coming down, and they have not touched bottom yet."

Provisions are fairly steady at the old rates. A year ago at this time hogs were selling at A year ago at this time hogs were selling at East Liberty for \$5 60 per cwt. Sheep and Lambs.

The run has been very light all this week. Receipts were scarcely large enough to make a market. Choice stock is higher, chiefly because of its great scarcity. Shippers were wis takes the precedence of staple meats. Prime Western wethers readily brought 20c per 100 above prices of a week ago, owing to scarcity.

HALF A CONVERSATION.

What an Animated Young Woman Helloed to Her Adored.

It occurred yesterday afternoon in a down town office. A tall handsome brunette tripped in, and, in the most pleasant kind of a manner, asked for the privilege of using the telephone. Of course, it was granted. Hall of the conversation which took place is given, because circumstances over which the reporter, who happened to be in, had no control, prevent the other half from appear-

#### MARKETS BY WIRE.

Wheat Opens Stronger on Bullish News From the Northwest, but Wenkens Under Free Realizing-Pork Declines and Rullies.

CHICAGO-There was a fair trade in wheat to-day, and the feeling was a little unsettled. There was considerable covering by shorts both for December and May, and also a good deal of realizing for May. Some foreign buying orders were also executed for Maydelivery. The market opened up very strong, and prices were 1/2% higher. Later they declined 11/2 for December and 1/2% for May, ruled easy and closed 1/4 lower for December and %clower for May than losing figures on yesterday.

The strong opening was due partly to the firm tone of cable advices. Local operators, too, were builtship inclined, influenced by the strong news from the Northwest, which quoted a sharp demand for cash and reported some large lots having changed hands at good prices. It was also rumored 24,000 bushels of winter for export here, and only a scarcity of vessel loads more than last week. In the receipts there were no strictly prime cattle, but about ten loads of good shippers from Ohio, loads of fancy hard special bin wheat stored at Ruffel and the working of some orders for both Chicago spring and Duluth hard wheat. One party here had inquiries for 20 loads of fancy hard special bin wheat stored at Ruffel and the stored at R

# SOUTHSIDE CHANCES

For People of Very Moderate means to Acquire Good Homes.

WHY THE BROKERS ARE THANKFUL

The Invention of the Circular Saw Claimed

for an Old Pittsburger. GOOD WORDS FOR LOAN ASSOCIATIONS.

The construction of the Castle Shannon Incline, the contemplated grading and pav-

ing of Washington and Grandview avenues and the talk of a street car line are giving quite an impetus to real estate on Mt. Washington. A Fourth avenue firm has sold about 75 lots in a plan near the terminus of the incline in the last 90 days. Prices are moderate but hardening as the district fills up, but there is still a good opportunity for people of moderate means to ac-

quire homes.

To show the upward tendency, the firm referred to stated yesterday that lots in Beltz-hoover borough purch-sed five years ago for \$150 are now valued at \$500.

All the brokers are thankful, but some of them are too modest to say so. W. F. Maxon-I am thankful to have gotter Luster at 15. So is the purchaser.

J. M. McBride—I am thankful for an order to

buy 500 La Noria. There is a commission in it.
Andrew Caster—I am thankful that I am living and able to cover my shorts in Philadelphia Gas at a round profit. Henry M. Long-I am thankful that things

no Philadelphia. Badger, Mustin, Harry Barbour and Finths wait-We are thankful we are so fat, Captain Barbour—I am thankful for everything, but more particularly that I will celebrate my thirteenth anniversary, December 6, and am sober.

THE DISPATCH sometime ago contained an article on big trees. It attracted the attention of C. N. Meriwether, of Gien Ellen, Tenn., who writes: "On the farm of Fletcher Beaumont, in Montgomery county, Tenn., there is a poplar tree 6 feet 1 inch in diameter five feet from the ground, and is apparently the same size up to the first limb, 75 feet above the ground. The tree is sound, and is estimated to contain 15,500 feet of lumber. No estimate has been made of its age, but it undoubtedly antedates any other living thing in this section."

J. E. Emerson, the Beaver Falls saw man facturer, says concerning the invention of the circular saw: "In 1870, while I was making my patent inserted toothed saws with Messrs, Hubbard Brothers & Co., on Water street, in Pitts burg, a very sprightly, intelligent, and welleducated old man, who said he was then 92 years of age, and that his name was Jack Coop, came in with an old rusty, circular saw, about 18 inches in diameter, to get it polished up. I at once became interested in it. The old man told me that in 1799 he made that saw while in the British navy by filing the teeth into it, and then got a hand-saw maker to straighten and polish it for him, and had a mandrel made, and used the saw in the navy. At that time I gave an account of the incident to the Scientific American, and it was published in that journal, the editors then claiming that in all probability this was the first circular saw ever made."

While it is very true that homes can be bought for spot cash for considerably less than they will cost on monthly payments, there are many who can never accumulate enough money to get the advantage of cash payment, but who can pay something every month. To evercome this difficulty building and loan associations were established, and the good they have done in enabling people to become owners of the houses they live in is beyond expression. None but a capitalist with a long purse can afford to sell houses and lots on monthly payments, but any one with a steady job can afford to buy on those terms. If misfortune overtakes him, and through failure to make final payments forfeits what he has already paid, he has the satisfacpaid a little higher rent than he otherwise

Every thinker knows that the man who would succeed must do more work than he gets paid for, in every profession and trade. It may be taken for granted that the man who will do only \$20 worth of work a week because his salary is but \$20 will never get more than \$20 a week, for the simple reason that he has never shown his employer that he is worth more. Good observers figure it that an employe who means to succeed has to do from 10 to 20 per cent more work than he gets actual pay for. This he has to do until he reaches a certain point, and, having reached that point, he will find that by as much as his income has increased by so much has the demand for amount and intensity of his labor diminished. Labor brings its market value; and is seldom over-paid, oftener underpaid. It is the experience the "Know How" that brings the money.

Said a prominent business man yesterday: "The fact has often been commented upon that the children of our former rich men are now wealthy only where their money was left to them invested in realty. Our values are at present so reasonable that no one need make a poor investment who will use ordinary prudence and judgment. One dollar invested now ought to produce \$2 within three years at farthest. And in the meantime any investor can sleep soundly, knowing as he must that his investment has a solid foundation and that the chances are ten to one that there will be no de-

SINKWS OF WAR

An Active Movement to the Meney Market and Rates Firm.

While there was nothing particularly new in local banking circles yesterday, the favorable conditions previously noticed continued.

The demand for accommodations was brisk and rates were firm at 667 per cent—the maximum to outsiders, which is causing something of a kick, but as there seems to be no remedy for the discrimination just now, they must grin for the discrimination just now, they must grin for the discrimination just now, they must grin and bear it. It is quite reasonable that regular customers should be given the preference.

Money was plenty for legitimate business. Checking and depositing were large. The exchanges were \$2.057.090 lo and the balances \$256,553 21. Both currency and exchange were in fair supply.

playing some queer capers of late. It bobs up and down without any particular reason, so far as I can see. I think the Standard is pulling the wires. It wants to wipe out the premium for one thing, and cheaper oil for another. If left to itself the market would advance, notwithstanding field developments."

Reports yesterday were to the effect that the well on the Beagle farm, in the Shanopin field, was doing 1,000 barrels a day. It is owned by the Raccoon Oil Company.

The Davis well in the Chartiers field, although not drilled in, was reported as keeping up a steady gait of 480 barrels a day. The Missionary No. 2 on the Cope farm, in the Brush Creek field, was doing 250 barrels.

Advices from St. Mary's, W. Va., stated: Two of the test wells drilling in this territory have come in in the last 24 bours. The Wise well, just across the line in Ritchie county, struck the sand last night, and is reported as a 15 barrel well. The well on the Cochran farm, near here, came in about the same time, a strong Sharrel capater.

BAD FOR THE TRUSTS.

Chlengo Gas Completely Knocked Out by the Illinois Supreme Court Decision-

Sugar Also Takes a Tumble-A Henvy Clone. New York, November 27.—A quiet stock market was generally expected to day and as far as the general list was concerned this expectation was realized, the trading being of the retail order, while a large number of brokers, having gone away over the holiday, there was a slim attendance at the board. There were the usual few exceptions, but the stocks of the regular list offered little feature throughout the day, and fluctuations were on the same

plane with the dealings, being confined to even

regular list offered little feature throughout the day, and fluctuations were on the same plane with the dealings, being confined to even a smaller range than usual.

The reports from the great fire at Lynn, Mass, had a depressing effect at the opening, and first prices were in most cases slightly lower than last evening, and though the list was remarkably well held, realization of profits forced a decline of 3 per cent in Denver and Fort Worth, bringing the stock down again to the lowest point for a week. Misseari Pacific was subjected to pressure apain from the bears, and it yielded over 1 per cent. Tennessee Coal shot up with a rush and reached still higher prices, touching 85%, but it as quickly receded, and dropped nearly 5 per cent from that point, closing at its lowest figure.

This was all there was to the general market, interest on which was completely obscured by the effect of the decision rendered yesterday by the Supreme Court of Illinois in the case of the Chicago Gas Trust. The decision reversed the decision of the lower court, and held that the trust, in acquiring control of other companies, had done an unlawful act, and, although the decision does not affect the property of the trust in any way, and cannot affect the sale of the property of it in any way it may elect, the effect of the naws upon the holders of certifica as was to cause a pante in the stock. Two brokers were specially prominent in the selling, and stopped at 48, when a slight rally occurred, but the drop was soon resumed, and 49% was reached, when a rally of about 3 per cent took place. Chicago houses had liberal selling orders, and the only buyers seemed to be the shorts, who were extremely cautious in their bidding.

The other trusts were fairly well held, with the exception of sugar, which yielded nearly 8 per cent. The market at the close was quiet not rather heavy at a shade better thus the lowest prices. Only one failure occurred, and the firm stated that they had no containing contract on the Exchange and no courted, and

53.502 shares, of which Sugar contributed 22,-There was the usual quiet business in railroad bonds and little or no feature marked the
dealings throughout the day.

Buffalo, N. Y., and the escaped convict of Sec. Cleveland, who was sent to the insane asylum a few days ago, escaped from that institution late on Tuesday and up to the present has not seed to be se -The New York grand jury yesterday after noon returned an indictment for murder in the first degree against Mrs. Hannah B. South-worth, who shot and killed Stephen Pettus last Friday morning. Later she was arraigned and pleaded not guilty.

—The Citizens' State Bank and T. F. Mc-Conaughy, mercant, of York, Nebraska, have made assignments for the benefit of creditors. The bank will probably pay in full. McConaughy's liabilities are not known. He was one of the stockholders in the Citizens' bank, and was cashier of the same.

There was a small sized panic among New York holders of Chicago Gas Trust certificates in Wall street yesterday morning. In the first two hours of business 60,000 shares were traded in and the price dropped II per cent. Chicago houses were the largest sellers. The adverse decision of the Illinois Supreme Court was the cause.

The Commissioner of Indian Affairs has directed the Indian Agent at the Kiowa and Comanche agency in the Indian Territory to promptly remove cattle found grazing on the reservation without the consent of the Indians. It is learned that several herds, aggregating about 30,000 head, are trespassing on the reservation.

—The Governor of South Cardina in his annual message to the Legislature recommends separate accommodations on railroads for whites and blacks, the amendment of the civil rights law passed by the Republicans in 1876, and the collection and preservation by the State of all Confederate flags. He also proposes a manner of refunding \$6,060,000 of the State debt.

The negotiations between President Adams, of the Union Pacific, and the Denver. Texas and Fort Worth people have resulted in agreements for the formation of a corporation, to be known as the Union Pacific, Denver and Guif Bailway, which will absorb the Fort Worth roa's and the Celorado lines of the Union Pacific, except the old South Park road, new known as the Denver, Leadville and Gunnison.

—The pussengers and crew of the burned steamer, Santiage, 59 in number, arrived in quarantine, New York, on Tuesday night. The fire in the Santuago broke out on the 18th, off Staten Island, and spread so rapidly that the vessel had to be abandoned. The four boats containing the refugees drifted all night, but were picked up by the A. J. Fuller in the morning. The loss is about \$1,000,000, but the crew and passengers are under.

-Dr. Calvin Case, of St. Louis, an intelligent colored physician, is at the Maryland University Respital, Baltimore, an incurable victim of the morphine habit. He was found on the street on Tuesday by a policeman, bleeding profusely from a wound in the thigh. He had partly broken himself of the morphine habit but the struggle on Tuesday was too much for him, and he swallowed seven grains of cocame, and then cut himself with a penkinfe. He was at one time a surgeon in the United States Army,
